321 Wallace Avenue

New Castle, Pa.

In presenting this brief descriptive price list, I have made the prices very low, which includes free delivery in the U. S. and Canada, on all orders exceeding \$2.00. For orders of \$2.00 or less, please add 15c for postage and packing.

In grading sizes, the letter L signifies large bulbs 1¼" or larger; M medium, ¾" to 1¼"; S small, less than ¾"; B bulblets, the latter are quoted per hundred, and blooming size bulbs per dozen, except where noted. Six will be furnished at dozen rates, less than six at one-tenth the dozen price each; One hundred at eight times the dozen price, and fifty at hundred rates.

The letter R after the name signifies ruffled. The letter P primulinus. PG primulinus grandiflorus.

Large bulbs usually bloom sooner than small ones, though the size and quality of blooms from bulbs one inch and upwards, are as good as those from larger sizes.

TERMS CASH WITH ORDER: 25% will hold orders until Spring.

Of the thousands of seedlings I have propagated during the past ten or fifteen years, I am only offering six this season which are high class and worthy of a place in the best flower gardens; two of these have been grown by Mr. Chas. E. F. Gersdorff of Washington, D. C. whose report on the same is as follows:-- "Your two seedlings scored very high in a most disappointing season of extremely dry weather. Under the conditions the spikes only showed seven open blooms at once, but these and the spikes otherwise were very excellent; I like them very much, and believe they should make a mark for themselves in the group of real high class sorts.

MRS. C. C. THAYER, planted May 5th, bloomed July 29; seven open in dry season; cameo pink to rose pink, tips flashed rose color and rose red, bases of lowers pinkish buff lined rose red; open triangular form. Score 90%.

LENA HULSE, planted May 5th, bloomed July 25th. Begonia rose blended spectrum red, bases, lowers lemon chrome lined scarlet. Amarillis form, seven open in a dry season. Score 90%."

Had the season been favorable these would have scored at least three points more as they usually grow four to four and a half feet high and show twenty or more blooms and buds: 30 is not unusual.

**TRY THESE NEW VARIETIES—I AM SURE
